SUMMARY

Computer Engineering graduate with hands-on experience in Python development, RESTful API development, SQL databases, computer vision, and embedded systems. Built software, machine learning, and IoT-based projects using FastAPI, MySQL, OpenCV, YOLO, Raspberry Pi, and Arduino. Seeking opportunities in software development to apply technical skills and contribute to building practical software solutions.

EDUCATION

Bachelor of Science in Computer Engineering
National University - Manila | Aug 2022 - July 2026

WORK EXPERIENCE

Engineering Intern (On-the-Job Training)
Advantek LLC | March 2026 – May 2026

- *Disassembled, assembled, upgraded, and tested automated machines used for defect detection in carrier tape manufacturing.*
- *Successfully built and commissioned five (5) production machines within a 240-hour internship program.*
- *Performed hardware layout, electrical wiring, and system integration following engineering and manufacturing standards.*
- *Collaborated with engineers and technicians to troubleshoot mechanical and electrical issues during machine assembly and testing.*

ACADEMIC PROJECTS

Helpdesk Support Ticket Management System

- *Developed a full-stack helpdesk ticket management application using Python, FastAPI, and MySQL, with an interactive web interface built using HTML, CSS, and JavaScript.*
- *Implemented RESTful API endpoints for ticket creation, retrieval, updating, and deletion, integrating the backend with persistent database storage.*

Machine Learning System for Oyster Mushroom Cultivation

- *Developed an end-to-end machine learning-driven oyster mushroom cultivation system for environmental monitoring.*
- *Integrated Raspberry Pi and Arduino to monitor temperature, humidity, and CO_2 levels in real time.*
- *Developed a web dashboard to visualize sensor data and improve environmental stability for mushroom cultivation.*

Saba Banana Counting System Using Object Recognition

- *Developed a Python-based computer vision system that automatically identifies and counts Saba bananas.*
- *Captured and annotated a custom image dataset using Roboflow in collaboration with the project team.*

TECHNICAL SKILLS

(Programming languages) *Python, SQL, JavaScript, HTML, CSS*
(Backend & Databases) *FastAPI, MySQL, RESTful APIs*
(Tools) *Git, GitHub, PyCharm, Visual Studio Code, IntelliJ IDEA, DBeaver*
(Computer Vision & AI) *YOLO (Ultralytics), OpenCV, PyTorch (Model Training & Inference)*

TRAININGS AND CERTIFICATIONS

Basic Occupational Safety and Health for Safety Officer 2 | *DOLE* *(Jan 2026)*
Certified in Cybersecurity Self-Paced Learning and Examination | *ISC2* *(Oct 2025)*
National Certificate in Computer Systems Servicing | *TESDA* *(Sep 2025)*
